

Arka

SOLID BIRCH OR OAK LOUNGE CHAIR

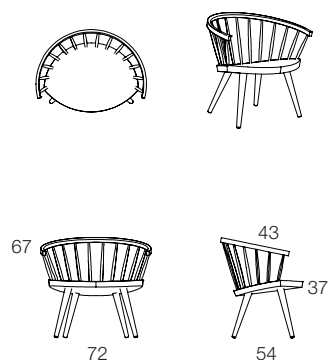

DESIGN: YNGVE EKSTRÖM

9018, 9019

SCALE 1:50

Scale illustrations are also available at www.stolab.se

DETAILS

1. The Arka lounge chair has a distinct design based on three different circles. With its unique design, Arka fits in just as well standing alone as it does in a group of several chairs.
2. With the sheepskin cushion (available as an option), Arka becomes a really comfortable place to sit for long or short periods of time.

FACTS ARKA

CONCEPT

In 1955 Yngve Ekström (known for such designs as the Lamino armchair) designed a low stick-back chair for Stolab that was given the name Arka.

We have brought the chair back to life and are proud to present it fully intact in its stately and unique form. Just as beautiful and more right than ever.

DESIGN
